Sr. Sales Engineer at Energeia | Helping Industries & Commercial Buildings Reduce Energy Costs & Emissions | ESCO | Dual Fuel Solutions | Energy Audit | Chiller/HVAC & Air Compressor Optimization | IoT & Energy Monitoring Systems
Ahmedabad, Gujarat, India

Summary

I am an energy efficiency and industrial automation professional with experience in delivering sustainable, data-driven solutions for industrial and commercial facilities across Gujarat. Currently, I work as Sr. Sales Engineer at Energeia, an ESCO focused on helping industries reduce energy costs, improve operational efficiency, and lower emissions through performance-driven energy solutions with little to no capital investment. At Energeia, I work closely with industrial and commercial customers to identify optimization opportunities in utilities such as Compressed Air Systems, Steam Systems, Chilled Water/HVAC Systems, and On-site Power Generation. Our approach combines Energy Audits, IoT-based monitoring, Energy Monitoring Systems (EMS), and utility optimization to deliver measurable and sustainable savings. Prior to joining Energeia, I gained hands-on experience in industrial automation, building management systems, energy monitoring, and maintenance through organizations including Digicon Automation and Triton Process Automation — authorized channel partners and system integrators for Honeywell and Danfoss solutions. My work involved BMS/EMS & VFD solutions, automation panels for Chillers and AHUs, control valves, VAV systems, air-side products, industrial instrumentation, and utility automation for commercial and industrial applications. I also worked with Dishman Carbogen Amcis in the Maintenance & Projects department, where I was involved in plant operations, instrumentation, troubleshooting, and project execution in a pharmaceutical manufacturing environment. In the renewable energy sector, I worked with Meteococontrol India, specializing in remote monitoring solutions for solar power plants. My role focused on PV plant performance monitoring, fault detection, system analytics, and ensuring optimal plant efficiency through real-time monitoring systems and automated alerts. I hold a Bachelor of Engineering in Instrumentation & Control from Shantilal

Shah Engineering College and a Diploma in Instrumentation & Control Engineering from Government Polytechnic Ahmedabad. I am passionate about helping industries and commercial facilities achieve energy efficiency, sustainability, operational reliability, and smarter utility management through innovative technologies and practical engineering solutions.

Experience

Energeia

Senior Sales Engineer

September 2024 - Present (1 year 10 months)

Ahmedabad, Gujarat, India

- Leading sales & business development for energy efficiency solutions across Gujarat.
- Driving B2B sales in HVAC, compressed air systems, and industrial utility audits.
- Offering technical consultation and tailored proposals for industrial clients.
- Managing key accounts in pharma, chemical, textile, plastic, and manufacturing sectors.
- Promoting Dual Fuel (Diesel + PNG/CNG) solutions for generator fuel optimization.
- Executing RECD projects to meet GPCB emission norms and improve compliance.
- Coordinating with technical teams for offers, designs, and compliance documentation.
- Supporting energy audits and monitoring project savings post-implementation.
- Collaborating with consultants and stakeholders to drive solution approvals.
- Ensuring timely proposals, client follow-ups, and revenue target achievement.

Digicon Automation Pvt Ltd

Senior Sales Marketing Executive

December 2023 - September 2024 (10 months)

Ahmedabad, Gujarat, India

- Driving B2B sales and business development in HVAC-R, Infrastructure, and Pump segments.
- Promoting DDC/HVAC controllers, sensors, EMS/BMS systems as integrated solutions.
- Managing key accounts and building long-term client relationships.

- Engaging with MEP consultants, contractors, and EPCs for project approvals.
- Leading product demos and solution discussions to position Digicon as a trusted integrator.
- Running targeted sales campaigns to grow share within existing accounts.
- Identifying new opportunities via market research and client interactions.
- Handling complete sales cycle: lead gen, proposals, pricing, and closing.
- Coordinating with technical teams for accurate techno-commercial offers.
- Negotiating contracts to align client needs with business objectives.

Triton Process Automation Pvt. Ltd.

Senior Sales Engineer

June 2022 - December 2023 (1 year 7 months)

Mumbai

- Lead sales operations across Gujarat for valves, BTU meters, sensors, and VAV products in HVAC, BMS, fire, ELV, and LMS segments.
- Managed regional sales strategy with channel partners to boost performance.
- Developed technical proposals leveraging HVAC/BMS expertise for consultants and contractors.
- Identified new business opportunities while nurturing existing client relationships.
- Delivered timely, competitive quotations to increase win rates and customer satisfaction.
- Conducted cost analysis to ensure profitability and commercial competitiveness.
- Met sales targets and KPIs by aligning activities with business goals.
- Provided end-to-end customer support from pre-sales to billing.
- Maintained accurate sales forecasts and CRM reporting, ensuring compliance.
- Built and leveraged strong industry network to stay aligned with market trends.

meteocontrol

Technical Sales & Service Engineer

January 2021 - June 2022 (1 year 6 months)

Ahmedabad

Handled technical sales, configuration, and service support for PV monitoring solutions, ensuring end-to-end performance management of solar energy systems across residential, commercial, and industrial segments.

Specialized in PV monitoring solutions, enabling real-time data acquisition and performance tracking of photovoltaic systems.

Configured Blue'Log X-Series Data Loggers for data collection and system integration with the electricity grid.

Set up and managed the VCOM (Virtual Control Room) platform—including VCOM Cloud, Monitoring, and CMMS—to provide clients with centralized, cloud-based solar plant monitoring and analytics.

Delivered remote technical support to clients for system configuration, troubleshooting, and performance optimization.

Supported installation, testing, and commissioning activities on-site, including weather monitoring station setup, sensor calibration, and panel wiring.

Ensured successful project execution by coordinating between internal teams and client-site activities.

Conducted off-site preventive and corrective maintenance, improving client satisfaction and system uptime.

Provided technical training and after-sales support to customers, enhancing solution adoption and performance visibility.

Dishman Carbogen Amcis Ltd

Instrument Engineer

August 2019 - December 2020 (1 year 5 months)

Sanand, Gujarat, India

Responsible for maintaining high equipment availability and ensuring seamless plant operations through proactive maintenance, troubleshooting, and calibration of instruments and electrical systems.

Attended breakdowns promptly as per department logs and ensured minimal downtime by quickly identifying faults and arranging necessary repairs or replacements.

Conducted preventive maintenance and routine servicing of instruments and equipment to reduce total breakdown hours.

Performed instrument calibration to ensure measurement accuracy and process control reliability.

Ensured strict adherence to LOTO (Lockout-Tagout) safety procedures during maintenance and electrical work.

Executed electrical installations, including wiring inspections and connection of single-phase and three-phase circuits with high safety compliance.

Carried out fault finding, testing, and repair/replacement of fittings, fixtures, and electrical components.

Developed and implemented Standard Operating Procedures (SOPs) and safety protocols aligned with plant operations and industry standards.

Managed electrical and mechanical maintenance activities, including AC systems, lighting, raw wiring, and general office power requirements.

Maintained compliance with ISO documentation and other regulatory standards during audits and plant inspections.

Ensured availability of spare parts and consumables by effectively managing maintenance inventory and stock levels.

Education

Shantilal Shah Engineering collage bhavnagar

Bachelor of Engineering - BE, Instrumentation and control · (May 2016 - May 2019)

Gujarat Secondary and Higher Secondary Education Board (GSEB)

High School, High School Equivalence Certificate Program · (July 2015 - July 2016)

Government Polytechnic Ahmedabad

Diploma engineering, Instrumentation and control engineering · (2013 - 2016)

Saraswati Vidhyalaya High School

SSC, School · (June 2008 - March 2013)
